

## **Bird boxes:**

What I like about the bird boxes is how on each one there are different ways to get up and down and different things to do on them. You climb up a rope, steps or a wall to get in or out of them, to get down, one has a pole you can use also. What I normally use the bird boxes for is to climb on and use all the things that are attached to them. I really like the bits underneath the bird boxes where you can sit, as well as on the top of them, they are good for hiding in. The bird boxes have been improved as they were turned around to make them safer.

## **Pirate ship**

I like the pirate ship because it has loads of different things on it to use and play on. I use the pirate ship to play on the climbing wall mainly but the other things on it that are very fun to use. I like having the pirate ship because it makes break and lunch even more fun because you have more things to do and play. The pirate ship is also sort of like an obstacle course so you can try not to touch the ground and get to the other side.
