

The play equipment

I really enjoy the play equipment and I think it was a great addition to Drake School.

The bird boxes are my favourite because you can either sit and relax in a bird box whilst talking to your friends but you can also play hide and seek because you can go in them, around them or under them but I would add tunnels leading from one bird box to another. Obviously it would have to have pillars holding up the tube but I think that tunnels would be an awesome addition to have on the bird boxes.

The pirate ship is also really good, it's fun to do races on who can complete it first or play a game called walk the plank where you have to push each other off the end of the ship. 'Floor is lava' is also a good game to play on the pirate ship because there is lots of places where you can climb and jump onto, I think it's fine how it is and there's nothing that I could really think of that could improve it.
